

# SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

**1.1. Product identifier** 

**Trade name** 

76 - Pit Fill for Resin **Product no.** 76

**REACH** registration number

Not applicable

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses of the substance or mixture Liquid resin for repair of windscreens

#### **Uses advised against**

The full text of any mentioned and identified use categories are given in section 16 **1.3. Details of the supplier of the safety data sheet** 

#### **Company and address**

HBC System Smarttool Production ApS Hobrovej 961-963 9530 Stövring Denmark tel:+45 70 22 70 70

# Contact person

Vibeke Jørgensen

# E-mail

## Other informations

ATEmix(inhale, vapour) > 20 ATEmix(dermal) > 2000 ATEmix(oral) > 2000 Eye Cat. 1 Sum = Sum(Ci/S(G)CLi) = 2,6664 - 3,9996 Skin Corr. 1A Sum = Sum(Ci/S(G)CLi) = 1,12 - 1,68 N acute (CAT 1) Sum = Sum(Ci/M(acute)i\*25) = 0,224 - 0,336

#### **SECTION 4: First aid measures**

## 4.1. Description of first aid measures

#### **General information**

In the case of accident: Contact a doctor or casualty department – take the label or this safety data sheet. Contact a doctor, if in doubt about the injured person's condition or if the symptoms continue. Never give an unconscious person water or similar.

#### Inhalation

Get the person into fresh air and stay with them.

#### Skin contact

Remove contaminated clothing and shoes at once. Skin that has come in contact with the material must be washed thoroughly with water and soap. Skin cleanser can be used. DO NOT use solvents or thinners.

# Eye contact

Remove contact lenses. Flush eyes with plenty of water (20-30°C) for at least 15 minutes and continue until irritation stops. Make sure you flush under the upper and lower eyelids. Contact a doctor at once.

#### Ingestion

Give the person plenty to drink and stay with the person. If the person feels unwell, contact a doctor immediately and take this safety data sheet or the label from the product with you. Do not induce vomiting unless recommended by the doctor. Hold head facing down so that no vomit runs back into the mouth and throat.

### **Burns**

Not applicable

#### 4.2. Most important symptoms and effects, both acute and delayed

Tissue damaging effects: This product contains substances which are corrosive. If vapour or aerosols are in haled, it can result in damage to lungs, irritation and burns in the respiratory organs as well as coughing. Corrosive substances cause irreversible damage to eyes and acid burns to skin.

Neurotoxic effect: This product contains organic solvents, which can have an effect on the nervous system. Symptoms of neurotoxicity can be: loss of appetite, headache, dizziness, whistling in the ears, tingling sensations in the skin, sensitivity to the cold, cramps, difficulty in concentrating, tiredness, etc. Repeated exposure to solvents can result in the breaking down of the skin's natural fat layer. The skin will then be more prone to absorb dangerous substances, e.g. allergens.

Sensitivity effects: This product contains substances which can give an allergic reaction on contact with skin. The allergic reaction will typically set in 12-72 hours after exposure as the substance penetrates the skin and reacts with proteins in the outer skin. The body's immune system sees the chemically changed protein as a foreign body and will try to destroy it.

Irritation effects: This product contains substances which cause irritation to skin and eyes, or when inhaled. Contact with locally irritative substances can cause the area of contact to be more prone to absorb damaging substances such as allergens.

# 4.3. Indication of any immediate medical attention and special treatment needed

#### No special

### Information to medics

Bring this safety data sheet.

#### **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

Recommended: alcohol-resistant foam, carbonic acid, powder, water mist. Water jets should not be used, since they can spread the fire.

## 5.2. Special hazards arising from the substance or mixture

If the product is exposed to high temperatures, as in the case of fire, dangerous catabolic substances are produced. These are: Carbon oxides. Fire will result in thick black smoke. Exposure to catabolic products can damage your health. Fire fighters should use proper protection gear. Closed containers, which are exposed to fire, should be cooled with water. Do not let fire-extinguishing water run into sewers and other water courses.

## 5.3. Advice for firefighters

Wear self-contained breathing apparatus and protective clothing to prevent contact.

#### **SECTION 6: Accidental release measures**

6.1. Personal precautions, protective equipment and emergency procedures

Avoid inhalation of vapours from waste material. Avoid direct contact with spilled substances.

- 6.2. Environmental precautions
- No specific requirements.

# 6.3. Methods and material for containment and cleaning up

Use sand, sawdust, earth, vermiculite, diatomaceous earth to contain and collect non-combustible absorbent materials and place in container for disposal, according to local regulations. Cleaning should be done as far as possible using normal cleaning agents. Solvents should be avoided.

#### 6.4. Reference to other sections

See section on "Disposal considerations" with regard to the handling of waste. See section on 'Exposure controls/personal protection' for protective measures.

#### **SECTION 7: Handling and storage**

#### 7.1. Precautions for safe handling

See section on 'Exposure controls/personal protection' for information on personal protection. Avoid direct contact with the product.

## 7.2. Conditions for safe storage, including any incompatibilities

Always store in containers of the same material as the original. Please be aware that this is a chemical that forms peroxides. The content of peroxide must be controlled regularly after opening for example every 6th month.

#### Storage temperature

No data available.

#### 7.3. Specific end use(s)

This product should only be used for applications described in Section 1.2

#### **SECTION 8: Exposure controls/personal protection**

#### 8.1. Control parameters

OEL No substances listed. DNEL / PNEC

#### 8.2. Exposure controls

No control is necessary if the product is used in a normal way.

# General recommendations

Observe general occupational hygiene.

#### Exposure scenarios

If there is an appendix to this safety data sheet, the indicated exposure scenarios must be complied. **Exposure limits** 

There are no maximum exposure limits for the substances contained in this product.

# Appropriate technical measures

Take ordinary precautions when using the product. Avoid inhalation of gas or dust.

## **Hygiene measures**

Whenever you take a break in using this product and when you have finished using it, all exposed areas of the body must be washed. Always wash hands, forearms and face.

## Measures to avoid environmental exposure

Keep damming materials near the workplace. If possible collect spillage during work.

Individual protection measures, such as personal protective equipment

#### Generally

Use only CE marked protective equipment.

#### **Respiratory Equipment**

If the ventilation at the work place is not sufficient, use a half or whole mask with an appropriate filter or an air-supplied respiratory protector. The choice depends on the concrete work situation and how long you will be using the product.

#### Skin protection

Special work clothing should be used. When working with this product for a long period of time, use a protective suit.

#### **Hand protection**

Use protective gloves. The concrete work situation is not known. Contact the suppliers of the gloves for help on the glove type. Please note that elastic gloves stretch when used. The thickness of the gloves, and therefore their penetration time, will be reduced. Moreover, the temperature of the glove in use is about 35°C, while the standard test, EN 374-3, is done at 23°C. The penetration time is therefore reduced by a factor of 3.

## **Eye protection**

Use safety glasses with a side shield.

#### **SECTION 9: Physical and chemical properties**

9.1. Information on b	asic physical a	nd chemical properties				
Form	Colour	Odour	рΗ	Viscosity	Density (g/cm3)

## **SECTION 10: Stability and reactivity**

### 10.1. Reactivity

- No data available
- 10.2. Chemical stability
  - The product is stable under the conditions, noted in the section on "Handling and storage".
- 10.3. Possibility of hazardous reactions No special
- 10.4. Conditions to avoid
- Do not expose to heat (e.g. sunlight), because it can lead to excess pressure.
- **10.5. Incompatible materials**

Strong acids, strong bases, strong oxidizing agents, and strong reductants agents.

# 10.6. Hazardous decomposition products

The product is not degraded when used as specified in section 1.

#### **SECTION 11: Toxicological information**

# 11.1. Information on toxicological effects

  - No

# **SECTION 16: Other information**

#### Full text of H-phrases as mentioned in section 3

- H226 Flammable liquid and vapour.
- H302 Harmful if swallowed.
- H312 Harmful in contact with skin.
- H314 Causes severe skin burns and eye damage.
- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H318 Causes serious eye damage.
- H319 Causes serious eye irritation.
- H332 Harmful if inhaled.
- H335 May cause respiratory irritation.
- H373 May cause damage to organs through prolonged or repeated exposure.
- H400 Very toxic to aquatic life.
