

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Trade name L19008 - UV-A1 filler Product no. L19008 REACH registration number Not applicable

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses of the substance or mixture UV Polyester filler for auto-body applications

Uses advised against

The full text of any mentioned and identified use categories are given in section 16 **1.3. Details of the supplier of the safety data sheet**

Company and address

HBC System Smarttool Production ApS Hobrovej 961-963 9530 Stövring Denmark tel:+45 70 22 70 70

Contact person

Vibeke Jørgensen

E-mail

info@hbc-system.com SDS date 2016-05-27 SDS Version 2.0

1.4. Emergency telephone number

Use your national or local emergency number See section 4 "First aid measures"

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

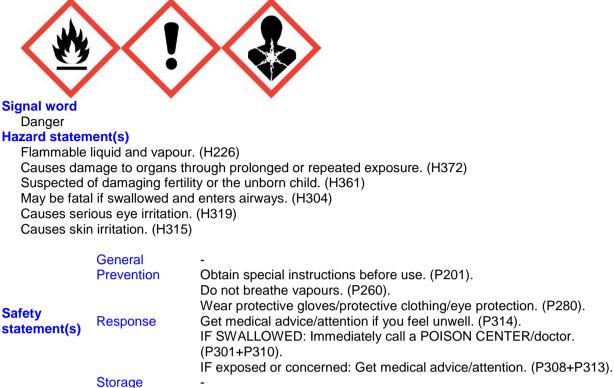

Flam. Liq. 3; H226 STOT RE 1; H372 Repr. 2; H361 Asp. Tox. 1; H304 Eye Irrit. 2; H319 Skin Irrit. 2; H315

See full text of H-phrases in section 2.2.

2.2. Label elements

Hazard pictogram(s)

Storage Disposal

Identity of the substances primarily responsible for the major health hazards styrene

2.3. Other hazards

This product contains substances that can give chemical pneumonia if inhaled. The symptoms of chemical pneumonia can appear after several hours.

This product contains an organic solvent. Repeated exposure to organic solvents can result in damage to the nervous system and inner organs, such as the liver and kidneys.

Additional labelling

Contains PHENYL, BIS, 2, 4, 6-TRIMETHYLBENZOYL, -PHOSPHINE, OXIDE. May produce an allergic reaction.

Additional warnings

voc

VOC-MAX: 350 g/l, MAXIMUM VOC CONTENT (B/c1): 540 g/l.

SECTION 3: Composition/information on ingredients

3.1/3.2. Substances/Mixtures

NAME:	styrene
IDENTIFICATION NOS.:	CAS-no: 100-42-5 EC-no: 202-851-5 REACH-no: 012119457861-32 Index-no: 601-026-00-0
CONTENT:	15-25%

Chronic 3	H226, H304, H315, H319, H332, H335, H372, H412
NOTE:	S
NAME:	PHENYL,BIS,2,4,6-TRIMETHYLBENZOYL,-PHOSPHINE,OXIDE
IDENTIFICATION NOS.:	CAS-no: 162881-26-7 EC-no: 423-340-5 REACH-no: 01-2119489401-38-0000 Index-no: 015-
189-00-5	<1%
CONTENT:	Skin Sens. 1, Aquatic Chronic 4
CLP CLASSIFICATION:	H317, H413

(*) See full text of H-phrases in chapter 16. Occupational exposure limits are listed in section 8, if these are available. S = Organic solvent

Other informations

 $\begin{array}{l} \mbox{ATEmix(inhale, vapour) > 20} \\ \mbox{Eye Cat. 2 Sum = Sum(Ci/S(G)CLi) = 1,592 - 0} \\ \mbox{Skin Cat. 2 Sum = Sum(Ci/S(G)CLi) = 1,592 - 2,388} \\ \mbox{N chronic (CAT 4) Sum = Sum(Ci/M(chronic)i^{*}25^{*}0.1^{*}10^{*}CAT4) = 0,6368 - 0,9552} \end{array}$

SECTION 4: First aid measures

4.1. Description of first aid measures

General information

In the case of accident: Contact a doctor or casualty department – take the label or this safety data sheet. Contact a doctor, if in doubt about the injured person's condition or if the symptoms continue. Never give an unconscious person water or similar.

Inhalation

Get the person into fresh air and stay with them.

Skin contact

Remove contaminated clothing and shoes at once. Skin that has come in contact with the material must be washed thoroughly with water and soap. Skin cleanser can be used. DO NOT use solvents or thinners.

Eye contact

Remove contact lenses. Flush eyes with water (20-30°C) for at least 15 minutes. Call a doctor. **Ingestion**

In the case of ingestion, contact a doctor immediately and take this safety data sheet or the label from the material with you. If the person is conscious, give them water. DO NOT try to induce vomiting, unless this is recommended by a doctor. Hold head facing down so that no vomit runs back into the mouth and throat. Prevent shock by keeping the injured person warm and calm. Give mouth-to-mouth resuscitation if breathing stops. If unconscious, roll the injured person onto side with the top leg bent at both knee and hip. Call an ambulance.

Do not induce vomiting! If vomiting occurs, keep head facing down so that vomit does not get into the lungs. Call a doctor or ambulance. Symptoms of chemical pneumonia can appear after several hours. People who have swallowed the product should therefore be kept under medical attention for at least 48 hours.

Burns

Rinse with water until the pain stops and continue for 30 minutes.

4.2. Most important symptoms and effects, both acute and delayed

This product contains substances that can give chemical pneumonia if inhaled. The symptoms of chemical pneumonia can appear after several hours.

Neurotoxic effect: This product contains organic solvents, which can have an effect on the nervous system. Symptoms of neurotoxicity can be: loss of appetite, headache, dizziness, whistling in the ears, tingling sensations in the skin, sensitivity to the cold, cramps, difficulty in concentrating, tiredness, etc. Repeated exposure to solvents can result in the breaking down of the skin's natural fat layer. The skin will then be more prone to absorb dangerous substances, e.g. allergens.

This product contains substances that may cause an allergic reaction in people who are already so disposed.

Irritation effects: This product contains substances which cause irritation to skin and eyes, or when inhaled. Contact with locally irritative substances can cause the area of contact to be more prone to absorb damaging substances such as allergens.

4.3. Indication of any immediate medical attention and special treatment needed

IF exposed or concerned:

Get immediate medical advice/attention.

Information to medics

Bring this safety data sheet.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Recommended: alcohol-resistant foam, carbonic acid, powder, water mist. Water jets should not be used, since they can spread the fire.

5.2. Special hazards arising from the substance or mixture

If the product is exposed to high temperatures, as in the case of fire, dangerous catabolic substances are produced. These are: Carbon oxides. Fire will result in thick black smoke. Exposure to catabolic products

can damage your health. Fire fighters should use proper protection gear. Closed containers, which are exposed to fire, should be cooled with water. Do not let fire-extinguishing water run into sewers and other water courses.

5.3. Advice for firefighters

Wear self-contained breathing apparatus and protective clothing to prevent contact.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Avoid direct contact with spilled substances. Avoid inhalation of vapours from waste material. Stores that have not ignited must be cooled by water mist. Where possible, remove flammable materials. Make sure there is sufficient ventilation.

6.2. Environmental precautions

No specific requirements.

6.3. Methods and material for containment and cleaning up

Use sand, sawdust, earth, vermiculite, diatomaceous earth to contain and collect non-combustible absorbent materials and place in container for disposal, according to local regulations. Cleaning should be done as far as possible using normal cleaning agents. Solvents should be avoided.

6.4. Reference to other sections

See section on "Disposal considerations " with regard to the handling of waste. See section on 'Exposure controls/personal protection' for protective measures.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

See section on 'Exposure controls/personal protection' for information on personal protection. Avoid direct contact with the product.

7.2. Conditions for safe storage, including any incompatibilities

Always store in containers of the same material as the original. Must be stored in a cool and ventilated area, away from possible sources of combustion.

Please be aware that this is a chemical that forms peroxides. The content of peroxide must be controlled regularly after opening for example every 6th month.

Storage temperature

No data available.

7.3. Specific end use(s)

This product should only be used for applications described in Section 1.2

SECTION 8: Exposure controls/personal protection

8.1. Control parameters

OEL

styrene (EH40/2005) Long-term exposure limit (8-hour TWA reference period): 100 ppm | 430 mg/m3 Short-term exposure limit (15-minute reference period): 250 ppm | 1080 mg/m3 DNEL / PNEC

DNEL (styrene): 406 mg/kg Exposure: Dermal Duration of Exposure: Long term – Systemic effects - Workers

DNEL (styrene): 343 mg/kg Exposure: Dermal Duration of Exposure: Long term – Systemic effects - General population

DNEL (styrene): 2,1 mg/kg Exposure: Oral Duration of Exposure: Long term – Systemic effects - General population

DNEL (styrene): 85 mg/m3 Exposure: Inhalation Duration of Exposure: Long term – Systemic effects - Workers

DNEL (styrene): 10,6 mg/m3

Exposure: Inhalation Duration of Exposure: Long term – Systemic effects - General population

DNEL (styrene): 289 mg/m3 Exposure: Inhalation Duration of Exposure: Short term – Systemic effects - Workers

DNEL (styrene): 174,25 mg/m3 Exposure: Inhalation Duration of Exposure: Short term – Systemic effects - General population

DNEL (styrene): 306 mg/m3 Exposure: Inhalation Duration of Exposure: Short term – Local effects - Workers

DNEL (styrene): 182,75 mg/m3 Exposure: Inhalation Duration of Exposure: Short term – Local effects - General population DNEL (PHENYL,BIS,2,4,6-TRIMETHYLBENZOYL,-PHOSPHINE,OXIDE): 7,8 mg/m3 Exposure: Inhalation Duration of Exposure: Short term – Systemic effects - Workers

DNEL (PHENYL,BIS,2,4,6-TRIMETHYLBENZOYL,-PHOSPHINE,OXIDE): 7,8 mg/m3 Exposure: Inhalation Duration of Exposure: Long term – Systemic effects - Workers

DNEL (PHENYL,BIS,2,4,6-TRIMETHYLBENZOYL,-PHOSPHINE,OXIDE): 3,3 mg/kg Exposure: Dermal Duration of Exposure: Short term – Systemic effects - Workers

DNEL (PHENYL,BIS,2,4,6-TRIMETHYLBENZOYL,-PHOSPHINE,OXIDE): 3,3 mg/kg Exposure: Dermal Duration of Exposure: Long term – Systemic effects - Workers

PNEC (styrene): 0,028 mg/L Exposure: Freshwater

PNEC (styrene): 0,028 mg/L Exposure: Marine water

PNEC (styrene): 0,614 mg/kg Exposure: Freshwater sediment

PNEC (styrene): 0,0614 mg/kg Exposure: Marine water sediment

PNEC (styrene): 0,2 mg/kg Exposure: Soil

8.2. Exposure controls

Compliance with the stated exposure limits values should be checked on a regular basis. General recommendations

Observe general occupational hygiene.

Exposure scenarios

If there is an appendix to this safety data sheet, the indicated exposure scenarios must be complied. **Exposure limits**

Trade users are covered by the rules of the working environment legislation on maximum concentrations for exposure. See work hygiene threshold values below.

Appropriate technical measures

Airborne gas and dust concentrations must be kept as low as possible and below the current threshold values (see below). Use for example an exhaust system if the normal air flow in the work room is not sufficient. Make sure that eyewash and emergency showers are clearly marked.

Hygiene measures

Whenever you take a break in using this product and when you have finished using it, all exposed areas of the body must be washed. Always wash hands, forearms and face.

Measures to avoid environmental exposure

Keep damming materials near the workplace. If possible collect spillage during work. Individual protection measures, such as personal protective equipment

Generally

Use only CE marked protective equipment.

Respiratory Equipment

If the ventilation at the work place is not sufficient, use a half or whole mask with an appropriate filter or an air-supplied respiratory protector. The choice depends on the concrete work situation and how long you will be using the product.

Skin protection

Special work clothing should be used. When working with this product for a long period of time, use a protective suit.

Hand protection

Use protective gloves. The concrete work situation is not known. Contact the suppliers of the gloves for help on the glove type. Please note that elastic gloves stretch when used. The thickness of the gloves, and therefore their penetration time, will be reduced. Moreover, the temperature of the glove in use is about 35°C, while the standard test, EN 374-3, is done at 23°C. The penetration time is therefore reduced by a factor of 3.

Eye protection

No specific requirements.

SECTION 9: Physical and chemical properties

9.1. Information on ba	sic physical a	and chemical properties

Skin corrosion/irritation

Causes skin irritation.

Serious eye damage/irritation

Causes serious eye irritation.

Respiratory or skin sensitisation No data available.

No dala avallable.

Germ cell mutagenicity

No data available.

Carcinogenicity

No data available. Reproductive toxicity

Suspected of damaging fertility or the unborn child.

STOT-single exposure

No data available.

STOT-repeated exposure

Causes damage to organs.

Aspiration hazard

May be fatal if swallowed and enters airways.

Long term effects

This product contains substances that can give chemical pneumonia if inhaled. The symptoms of chemical pneumonia can appear after several hours.

Neurotoxic effect: This product contains organic solvents, which can have an effect on the nervous system. Symptoms of neurotoxicity can be: loss of appetite, headache, dizziness, whistling in the ears, tingling sensations in the skin, sensitivity to the cold, cramps, difficulty in concentrating, tiredness, etc. Repeated exposure to solvents can result in the breaking down of the skin's natural fat layer. The skin will then be more prone to absorb dangerous substances, e.g. allergens.

This product contains substances that may cause an allergic reaction in people who are already so disposed. Irritation effects: This product contains substances which cause irritation to skin and eyes, or when inhaled. Contact with locally irritative substances can cause the area of contact to be more prone to absorb damaging substances such as allergens.

12.1. Toxicity Substance	Species	Test	Test duration	Result

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Restrictions for application

People under the age of 18 must not be exposed to this product cf. Council Directive 94/33/EC. Pregnant and nursing women must not be exposed to the effects of this product. The risk, and possible technical precautions or design of the workplace to avoid such risk, must therefore be evaluated. Demands for specific education
