

After having downloaded and unzipped the software open the HBC Paint Manager folder

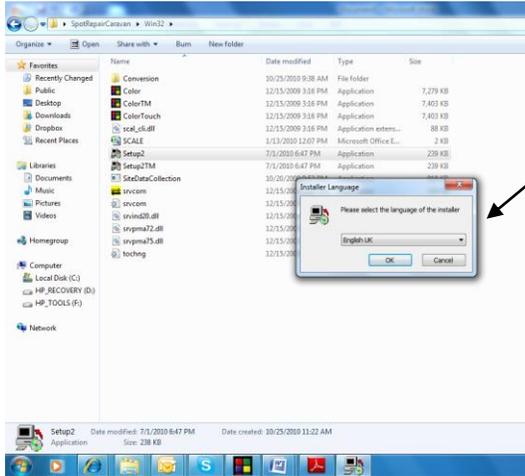

2. Double click / open the folder "win32"

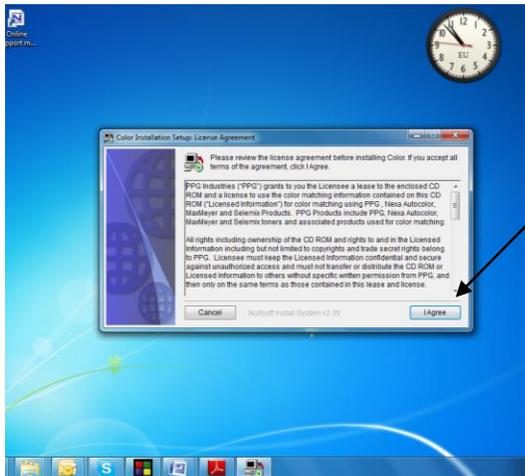

3. Double click on the icon "setup2"

4. Select your preferred language and press "Ok"

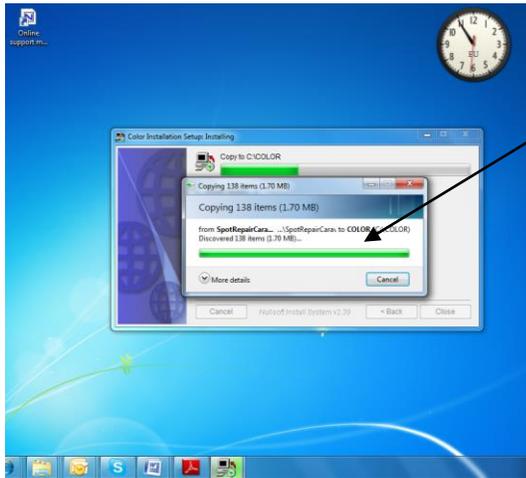

5. Select "I agree"

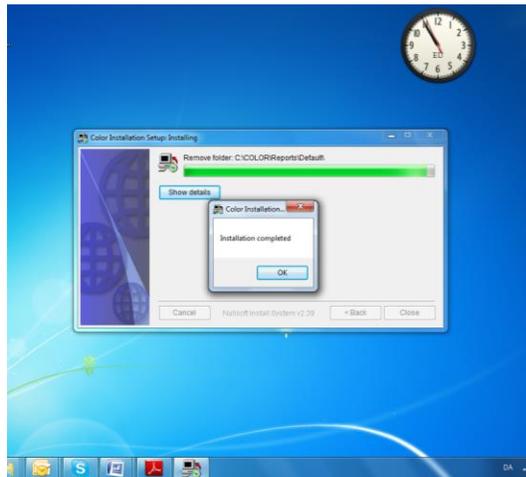

6. Select "Install"

7. Installation of the program is in progress.

8. Installation is completed. On your desktop the icon "COLOR" appears

9. To open the software double click the icon "COLOR". Insert the installation code you received together with the system.

Now you can start to use the Mixing formulas.
