**SAFETY**

REMEMBER! Be aware of your own safety. Handle these products with caution. Do not let children near any of the products. Always use the included mask and plastic gloves and safety glasses when using these materials. Wash your hands and arms thoroughly before eating, going to the toilet and after work if you have been in contact with chemicals. Make sure that the work area is well ventilated. Avoid direct skin and eye contact. Avoid inhalation. The products must not be placed in the vicinity of flames or other heat-generating appliances. Provide effective fire-fighting equipment - Fires are best extinguished with a dry powder extinguisher. Do not use water when flammable liquids are on fire.

**Product description**

Easy to use system for cleaning and protecting leather upholstery and interior components. This unique leather care system provides you with an original, natural satin sheen leather surface without leaving a greasy film residue. The leather care products are suitable for leather seats, dashboards, steering wheels, etc.

The leather care system contains four different leather care / treatment products:

### **HBC Ink Remover, Stick** (Part no. 00.939)

HBC Ink Remover eliminates stains and pen marks, ink and lipstick from pigmented leather. Do not use on nubuck, suede or aniline leather

- 01) Remove the screw cap and push up the tip about 4 mm out of the tube, unscrewing it.
- 02) Pre-test on a concealed area.
- 03) Pass the HBC Ink Remover stick repeatedly over the point to be cleaned, pressing gently.
- 04) Let the product work on the stain for about 30 sec.
- 05) Wipe off HBC Ink Remover with a soft dry cloth.
- 06) Clean with Leather Cleaner.
- 07) Apply HBC Leather Guard, rubbing the leather gently with circular movements, then let it dry.

### **HBC Leather Cleaner, STRONG** (Part no. 00.940)

HBC Leather Cleaner, strong contains a highly effective detergent for cleaning pigmented leather upholstery like car, motorcycle, boat, airplane and sofa seats.

It can also be used on other resistant leather articles like shoes and handbags. It is not suitable for aniline leathers, nubuck or suede. If you have a delicate skin or if you use frequently HBC Leather Cleaner, strong, please wear latex gloves while using the product.

- 01) Shake the bottle well before using.
- 02) Pre-test the colorfastness on a hidden area.
- 03) Put HBC Leather Cleaner, strong onto a soft sponge and produce foam by squeezing it repeatedly.
- 04) Clean the area without rubbing.
- 05) Wipe the excess foam and the soiling away with a soft white cotton cloth.
- 06) Dry with a dry cloth and let dry fully.

### **HBC Leather Guard (Leather Protection Cream) (Part no. 00.941)**

HBC Leather Guard is a water based protection cream for all leather types, except nubuck and suede. HBC Leather Guard protects against oil, water and alcohol based stains as well as everyday dirt and grime.

It will also keep your leather lovely and soft, and when used regularly prevents pigmented leather from cracking. We recommend your leather is cleaned and re-protected at least every six months. Aniline leather placed in rooms subject to heavier use may need cleaning more regularly and more thoroughly.

- 01) Shake the bottle well before using.
- 02) Pre-test the colorfastness on a hidden area.
- 03) Put HBC Leather Cleaner, strong onto a soft sponge and produce foam by squeezing it repeatedly.
- 04) Clean the area without rubbing.
- 05) Wipe the excess foam and the soiling away with a soft white cotton cloth.
- 06) Dry with a dry cloth and let dry fully.

### **HBC Leather Stain Remover (Part no. 00.942)**

HBC Stain remover removes resistant stains from leather and PVC. Do not use on aniline, nubuck or suede. Use this product with caution.

- 01) Apply a little HBC Stain remover on a clean cloth.
- 02) Test the colour resistance of the leather on a hidden spot.
- 03) Rub lightly on the leather to see if there is no colour transfer onto the cloth.
- 04) If this test is OK, rub lightly with the cloth over the stained area.
- 05) If needed, treat the stained area once more, checking regularly that no colour is transferred onto the cloth.
- 06) Clean the treated area with HBC Leather Cleaner.
- 07) Let dry and apply HBC Leather Guard.
